A. Woods, seashores, even parks contain poison ivy. Never touch poison ivy. It can make your skin itch and blister. The poison that is in poison ivy is an extremely irritating oil. It is found in all parts of the plant, not just the leaves. Poison ivy grows as a bush, and as a vine that climbs over fences and up trunks of trees. In summer, the leaves are shiny green. They turn scarlet in the fall. Each leaf is made up of three leaflets. If you should ever touch poison ivy, quickly scrub the oil off with a strong laundry soap. Poison oak is closely related to poison ivy. You can win a World Almanac if your question is selected. Send your name and age to JOHNNY WONDER, c/o this newspaper, P.O. Box 1288, (DA) Santa Cruz, CA 95060.
